

# Most Businesses Are Losing Revenue Every Day

Missed calls. Slow follow-up. Operational inefficiency.

---

**WILKOSYSTEMS** — AI Infrastructure & Automation Systems  
A WILKO GROUP LTD Company

# The Problem Is Not Marketing

Most businesses invest heavily in attracting customers — then lose them silently. Not through poor products or weak pricing, but through the invisible gaps in their daily operations. The real cost is rarely measured, and almost never addressed.

## Missed Calls

Every unanswered call is a competitor's opportunity.

## Slow Replies

Leads go cold within minutes of first contact.

## Operational Chaos

Manual admin overwhelms teams and kills productivity.

## Overwhelmed Staff

People buried in repetitive tasks cannot focus on growth.

# Every Missed Lead Has a Cost

## The Silent Revenue Leak

Consider a conservative scenario: your business misses just **3 leads per day**, each worth **€200 in lifetime value**.

€1,800

Lost Per Week

€18K

Lost Per Month

€216K

Lost Per Year

## The Compounding Effect

These are not theoretical figures. They represent real enquiries from real customers who called, received no answer, and booked with your competitor instead. Operational inefficiency does not merely cost you time — it costs you compounding, measurable revenue every single day.

 Every day without automated follow-up is a day your competitors gain ground.

# Businesses No Longer Need More Employees for Repetitive Tasks

The operational model has changed. AI systems can now handle the tasks that once required dedicated headcount — with greater speed, consistency, and zero downtime.

## Answer Every Call

AI receptionists handle inbound calls instantly, 24 hours a day, 7 days a week — with no hold times.

## Qualify & Book

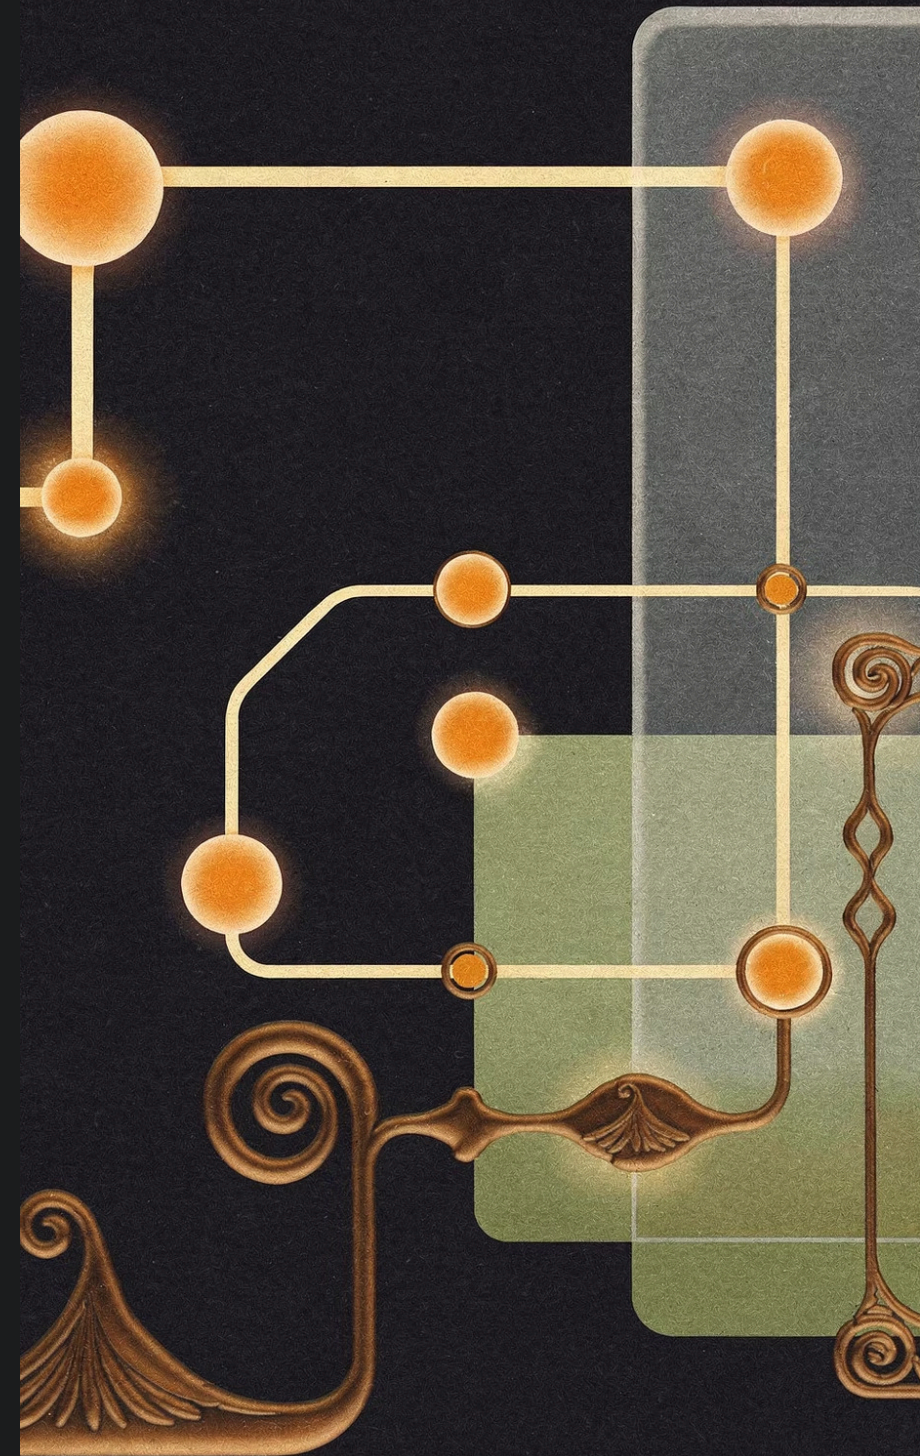

Leads are automatically qualified and appointments booked directly into your calendar without human intervention.

## Follow Up Instantly

Automated SMS, WhatsApp, and email sequences engage every lead within seconds of first contact.

## Automate Workflows

Repetitive administrative tasks — data entry, reminders, reporting — are handled entirely by automated systems.

WHAT WE BUILD

# AI-Powered Business Infrastructure

WILKOSYSTEMS installs operational systems that automate communication, recover lost leads, and streamline business workflows — end to end. This is not a chatbot. This is not a plugin. This is **enterprise-grade AI infrastructure** built to replace the operational bottlenecks that cost businesses thousands every month.

## What We Are

- An operational systems provider
- A business infrastructure company
- A workflow automation partner
- A scalable AI systems integrator

## What We Are Not

- A generic AI agency
- A chatbot vendor
- A short-term software tool
- A one-size-fits-all solution

# The WILKOSYSTEMS Growth Infrastructure™

Five interconnected systems, each engineered to eliminate a specific operational bottleneck — deployed together as a unified, scalable infrastructure layer for your business.

1

## AI Receptionist System

Every call answered. Every lead captured. Appointments booked automatically around the clock.

2

## Speed-to-Lead Automation

Instant automated follow-up the moment a lead enters your funnel — before competitors even pick up the phone.

3

## Google Review Automation

Systematically build social proof. More five-star reviews mean more inbound trust and organic enquiries.

4

## Website Conversion System

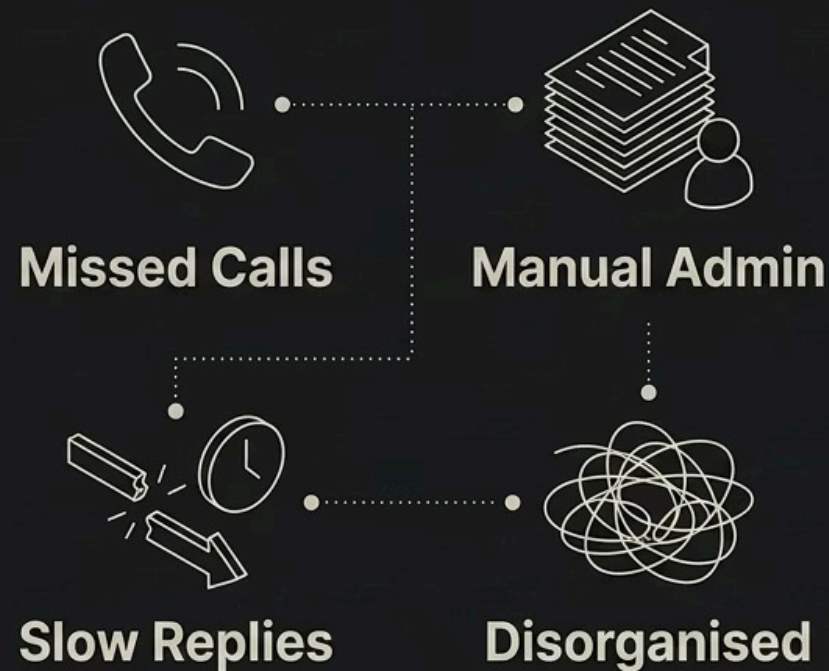

Transform passive website visitors into booked consultations through intelligent, automated engagement.

5

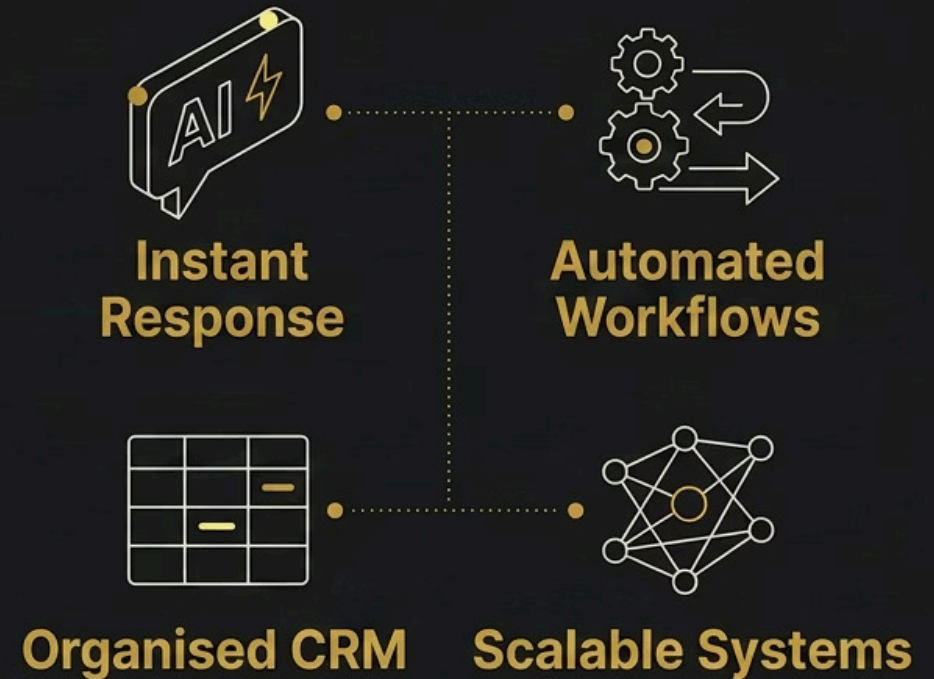

## CRM & Pipeline Infrastructure

A fully organised, automated CRM that tracks every lead, every conversation, and every opportunity at scale.

# Before vs After WILKOSYSTEMS

**Overwhelmed staff.  
Disorganised and slow  
communication.**

**Streamlined operations  
and instant automated  
responses.**

The operational gap between these two states is not a matter of effort — it is a matter of systems.

# AI Is Becoming Business Infrastructure

The window for competitive advantage is narrowing. Businesses that implement automation today are building operational moats that will be increasingly difficult to close. The question is no longer *whether* to automate — it is *how quickly* you move.

## → Rising Labour Costs

Wage inflation and recruitment overhead are compressing margins across every sector.

## → Escalating Customer Expectations

Modern customers expect instant responses. Anything slower loses the sale.

## → Accelerating Industry Adoption

Forward-thinking businesses in every vertical are deploying AI operational systems at pace.

## → First-Mover Advantage

Early adopters in local markets are already capturing the leads their competitors are missing.

# Traditional Operations vs Automation Infrastructure

Dimension	Traditional Employee	WILKOSYSTEMS Infrastructure
Monthly Cost	€3,000 – €5,000+	Fixed, predictable subscription
Availability	Business hours only	24/7, 365 days per year
Sick Days & Leave	Unplanned downtime	Zero downtime, ever
Scalability	Hire → onboard → manage	Instantly scalable, no overhead
Response Speed	Minutes to hours	Instant, automated
Consistency	Variable	100% consistent, every time

 The goal is not replacing people. The goal is eliminating repetitive operational bottlenecks so your team can focus on the work that actually drives growth.

SYSTEM 1

# Never Miss Another Customer Call

The AI Receptionist System answers every inbound call in real time, qualifies the caller, books the appointment, and logs the interaction directly into your CRM — all without human involvement.

## Instant Answering

Every call picked up on the first ring, every time.

## Multilingual

German, English, and beyond — supporting DACH markets natively.

## Lead Qualification

Intelligent screening captures intent and filters serious prospects.

## Auto-Booking

Appointments confirmed directly into your live calendar.

## SMS Follow-Up

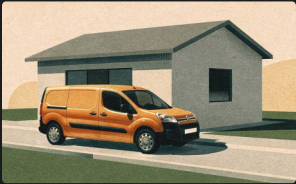

Automated confirmation and reminder messages sent instantly.

## CRM Sync

Every interaction logged and organised without manual data entry.

# Real Business Use Cases

WILKOSYSTEMS infrastructure is engineered to solve the specific operational challenges that surface in high-volume, relationship-driven industries — where every missed call is a missed conversion.

## Local Service Businesses

**Problem:** Calls missed during jobs.

**System:** AI Receptionist + booking automation.

**Outcome:** More booked jobs, zero missed leads.

## Real Estate Firms

**Problem:** Slow follow-up on property enquiries.

**System:** Speed-to-Lead + CRM pipeline.

**Outcome:** Faster conversions, organised pipeline.

## Dental Clinics & Healthcare

**Problem:** Missed appointment requests and no-shows.

**System:** Booking automation + reminder workflows.

**Outcome:** Fuller diaries, reduced cancellations.

## Agencies & DACH Companies

**Problem:** Manual client communication and admin overhead.

**System:** Full Growth Infrastructure™ stack.

**Outcome:** Scalable operations without added headcount.

# Service Packages

Three clear infrastructure tiers — from essential automation to fully custom enterprise deployment. Each package is designed to deliver measurable ROI from day one.

STARTER

## WILKOSYSTEMS STARTER

€297/mo

- Missed-call text-back automation
- Lead capture system
- CRM integration
- Google review automation

★ MOST POPULAR

## WILKOSYSTEMS GROWTH

€997/mo

- AI Receptionist System
- WhatsApp automation
- Booking & calendar system
- Full CRM integration
- Custom workflow setup

ENTERPRISE

## CUSTOM INFRASTRUCTURE

**Bespoke pricing** — Enterprise workflows, advanced AI infrastructure, and fully custom automation systems built around your specific operational architecture.

# Real Automation in Action

From the moment a prospect makes contact, WILKOSYSTEMS infrastructure takes over — ensuring no lead is lost, no follow-up is forgotten, and no appointment goes unconfirmed. Here is the complete automation sequence:

Incoming Call

AI Responds

CRM Entry

Automated Follow-Up

This entire sequence executes in seconds — without a single manual action from your team. Every touchpoint is logged, every lead is tracked, and every opportunity is captured within your CRM pipeline automatically.

GETTING STARTED

# 14-Day Free Automation Trial

Experience the full WILKOSYSTEMS infrastructure live inside your business — zero risk, zero long-term commitment. Most clients see measurable results within the first week of deployment.

1

## Free Demo

A live walkthrough of the systems relevant to your specific business and operational challenges.

2

## Setup & Integration

Your existing tools, phone lines, and CRM are connected. Infrastructure is configured to your workflow.

3

## System Launch

All automation systems go live. Your team requires no retraining — the systems work silently in the background.

4

## Optimisation & Support

Ongoing monitoring, performance reporting, and dedicated support to maximise system output and ROI.

# Why WILKOSYSTEMS. Why Now.

## The Competitive Landscape Is Shifting Fast

Businesses that automate their operations today are building structural advantages that compound over time. Those that delay are not merely standing still — they are actively falling behind.

80%

of leads go cold

within 5 minutes of first contact

62%

of calls go unanswered

in small-to-medium businesses

## What Sets WILKOSYSTEMS Apart

- Infrastructure-first approach — not tools, not plugins
- Built for DACH market conditions and language requirements
- Full-stack deployment — systems work together, not in isolation
- Dedicated onboarding and ongoing optimisation support
- Proven ROI framework with measurable outcomes
- Scalable from single-location SME to multi-site enterprise

# The WILKOSYSTEMS Promise

"We do not sell software. We install operational systems that make your business structurally more efficient, more responsive, and more profitable — from day one."

— **WILKO GROUP LTD** | AI Infrastructure & Automation Systems

## Recover Lost Revenue

Capture every lead that would have otherwise been missed — automatically and instantly.

## Eliminate Bottlenecks

Remove the manual, repetitive tasks that consume your team's capacity and slow growth.

## Scale With Confidence

Build operational infrastructure that grows with your business — without proportional cost increases.

FOR INVESTORS & DECISION-MAKERS

# Enterprise-Grade AI Infrastructure at Any Scale

WILKOSYSTEMS is built on the same operational principles that power enterprise automation — delivered with the speed and accessibility that growing businesses require. Whether you are evaluating this as a business investment, a technology partner, or a competitive advantage, the case is clear.

## Proven Infrastructure Stack

Battle-tested  
automation systems  
with measurable,  
auditable outcomes.

## Recurring Revenue Model

Predictable  
subscription  
architecture with low  
churn and high  
retention economics.

## Scalable Deployment

Infrastructure scales  
horizontally across  
clients, markets, and  
verticals without  
linear cost growth.

## DACH Market Focus

Deep localisation for German-speaking markets — a significant, underserved automation opportunity.

# What Our Clients Experience

From the first week of deployment, businesses report the same transformation: fewer missed opportunities, faster follow-up, more organised operations, and teams finally freed from repetitive tasks.

“

"Within the first two weeks, we stopped missing calls entirely. The system books appointments while we are on-site with customers. We had no idea how much revenue we were leaving on the table."

— **Local Service Business Owner, DACH Region**

”

“

"Our front desk was overwhelmed with admin. Since deploying WILKOSYSTEMS, appointment bookings are fully automated and our team focuses entirely on patient care. The difference has been remarkable."

— **Dental Clinic Principal, Austria**

”

“

"Lead follow-up used to take us 24–48 hours. Now it is instant. Our conversion rate from initial enquiry to consultation has nearly doubled in under a month."

— **Real Estate Agency Director, Germany**

”

# Your Next 30 Days — With WILKOSYSTEMS

Implementation is fast, non-disruptive, and designed to deliver visible results within the first week. Here is what the first 30 days look like once you commit to the free trial.

## Day 1–2: Discovery & Demo

Operational audit and live system demonstration tailored to your industry and workflows.

1

2

## Day 3–5: Setup & Integration

All systems configured, connected to your existing tools, and tested before going live.

3

## Day 6–14: Live Trial

Full automation infrastructure running live in your business. First results and leads captured.

4

## Day 15–30: Optimisation

Performance review, system fine-tuning, and strategic recommendations for scaling your infrastructure.

✔ Most clients recover the cost of their first month within the first 7 days of deployment through recovered leads alone.

# Stop Losing Customers.

## Book Your Free Automation Demo Today

Missed calls. Slow follow-up. Manual admin. These are operational problems with operational solutions. Let WILKOSYSTEMS build the infrastructure that recovers your revenue and scales your business — automatically.
